

Test Instructions - Floorball Shot Plotter v3.0

Overview

You are testing a tool for logging and analyzing shot and goal statistics in floorball. The program is based on clicking shots/goals onto the field, selecting attributes, and then receiving visual and statistical analysis. Below are key features to test and what to verify.

1. Shot and Goal Input

? Click in the canvas area (center panel) to add a shot or goal.

? Follow the popup dialogs and try different combinations:

- Phase
- Situation
- Type of Finish
- Shooter stick hand
- Passer stick hand
- Pass origin location

? You can clear all shots by clicking the trash can icon.

? Or press the spacebar near a point to remove the closest event.

2. Hover Features

? Hover over a row in the shot log table (right side), or

? Hover over a point in the canvas area (middle) to preview the shot and any assist.

3. Statistics Filter

? Use the dropdown menu to only show shot statistics for individual periods.

4. Heatmap Modes (View Modes)

? Try different View Modes to see visual patterns of the logged shots:

- Heatmap (All shots)
- Goal Heatmap (Only goals)
- Save Heatmap (Only saves)
- Plot (Where you can add new events)

Test Instructions - Floorball Shot Plotter v3.0

4.1 Heatmap Settings

You can adjust how sensitive or detailed the heatmap is:

- Heatmap color ? choose color scheme
- Heatmap quality ? low/medium/high/ultra
- Preset ? pre-configured heatmap settings for different analysis types
(Good if you don't want to tweak manually)
- Sensitivity Slider ? filters out zones with fewer shots
- KDE Bandwidth Slider ? controls the smoothness/detail of the map

5. Demo Button

? Click Generate Demo Shots to generate 30 random shot/goal events per click.

? Useful for testing all UI elements without real match data.

6. Period Filter

? Choose what periods you want to see using the buttons: 1, 2, 3, OT, or All

? This also controls what period new shots/goals are logged to.

7. Shot Log (Right Panel Table)

Each row represents one shot or goal.

Columns:

? Entry number

S/G ? Shot or Goal

Phase ? Defensive phase

Situation ? Game situation

Type ? Shot type

Passer ? Passer's stick hand (L/R)

Shooter ? Shooter's stick hand (L/R)

P ? Period

xG ? Expected Goals value (0?1)
